Adopt A School & eCharting Program

- 2015 – 2022

Executed 2015 – 2016

- 30 adopted schools
- 90 volunteer dentists trained in eCharting
- 8,000 pupils eCharted

Conclusion: technically and organizationally feasible:

1. Online eCharting
2. Automatically generating digital statistics
3. Focus on ICDAS

Adopted schools

DentalCharting
Clinic Management

DENTAL CHAPTER	ADOPTED SCHOOL
REGION 1	
Baguio City	Dominican Mirador Elementary School
Pangasinan	Malabago Elementary School
REGION 2	
Cagayan Tuguegarao	Alibago Elementary School
REGION 3	
Angeles City	Mining Elementary School
Tarlac	Cruz Elementary School
Pampanga	San Jose Elementary School
REGION 4	
Quezon Province	Mayao Castillo Elementary School
Cavite	Ligas II Elementary School
Batangas Province	Cawit Elementary School
Batangas City	Sta. Clara Elementary School
Lipa City	Claro M. Recto Memorial Elementary School
Occidental Mindoro	Tagumpay & Mapaya II Eschools
Palawan	Magbanua Elementary School
Romblon	Tumingad Elementary School
Marinduque	Makapuyat Elementary School

Adopted schools (2)

DENTAL CHAPTER	ADOPTED SCHOOL
NCR	
Pasig-Pateros	Caniogan Elementary School
REGION 6	
Ilo-ilo City	Molo 1 Elementary School
Capiz City	Don Juan Celino Memorial Elementary School
Antique	Atabay Elementary School
REGION 7	
Cebu	Labangon Bliss Elementary School
Mandaue	Sayaw Elementary School
REGION 9	
Zamboanga City	Tugbungan Elementary School
Zamboanga-Sibugay	Tomitom Elementary School
REGION 10	
Bukidnon	Can-ayan Integrated School
Iligan City	Kabangahan Elementary School

Adopted schools (3)

Clinic Management

DENTAL CHAPTER	ADOPTED SCHOOL
REGION 11	
Davao City	Marahan West Elementary School
REGION 12	
General Santos City	Lamlifew IP Integrated School
North Cotabato	Miguel Intes Elementary School
REGION 13	
Surigao del Norte	M. Cagasan Memorial Elementary School
REGION 18	
Negros Occidental	Hope GK Sibol Elementary School
ARMM	
Sulu Tawi-Tawi	Camp Asturias Elementary School
AFFILIATE	
PAPSDI	Pasong Tamo Elementary School

What and What not

DentalCharting
Clinic Management

WHAT: ASeCP today, **IS** about:

- Proof online digital technology works: only practical option
- ASeCP demonstrates that dental health surveys of very large cohorts are within reach for the first time ever, by means of the eCharting approach

WHAT NOT: ASeCP today, is **NOT YET** about:

- Scientific epidemiological study

WHAT WILL be: ASeCP **TOMORROW:**

- Scientific epidemiological study
- Real field data input for health policy formulation
- Public dental health tracking

EDR

DentalCharting
Clinic Management

Electronic Dental Record:

- Pupils' profile + MH + DH + uploaded referrals, X-rays
- Automatic prescriptions
- School profile
- eChart (PDA compliant)
 - Baseline
 - Work proposed
 - Work done
 - Periodontal

EDR (2)

Electronic Dental Record (cont'd):

- 900 statuses/procedures including basics such as
 - caries, fillings, missing teeth (DMF, df)
 - extractions, fillings, oral prophylaxis, fluoride treatment, application of sealant/varnish
- ICDAS 1-6
- 400 materials
- Signs & symptoms, Diagnoses

ICDAS in EDR

Dental
Clinic Management

Other functions EDR

DentalCharting
Clinic Management

Electronic Dental Record (cont'd):

- Schedule appointments
- Plan school dental budget
- Extract statistics from the cohort database: graphs

eCharting statistics

DentalCharting
Clinic Management

Graphical output:

- Count of pupils, both male and female
- Prevalence Rate
- Incidence Rate (dormant)
- Ratio of the occurrence of the indicator relative to the other indicators in its cluster (if called for)
- Distinction between temporary and permanent teeth
- Distinction between tooth surfaces, teeth and the full mouth (if called for)

eCharting statistics (2)

Prevalence Rate of indicator X	Incidence Rate of indicator X (dormant)
$\frac{\text{total \# teeth*) with indicator X}}{\text{\# of pupils}} \times 100$	$\frac{\text{total \# teeth with indicator X}}{\text{\# of pupils with indicator X}} \times 100$

*) or tooth surfaces, or full mouth when called for

eCharting indicators

DentalCharting
Clinic Management

Baseline and ***Work done***

- For permanent teeth
 - D
 - M
 - F
- For temporary teeth
 - d
 - f
- ICDAS 1-6 for permanent and for temporary teeth
- Preventive therapies for permanent and for temporary teeth
 - Sealant
 - Varnish

eCharting indicators (2)

DentalCharting
Clinic Management

Baseline and ***Work done*** (cont'd)

- Miscellaneous oral disease conditions for permanent and for temporary teeth
 - Decubital ulcer
 - Periodontal problem
 - Gingivitis
 - Abscess

eCharting indicators (3)

Work proposed

- For permanent teeth
 - F
 - E
- For temporary teeth
 - f
 - xt
 - xt-rtt
- Preventive therapies for permanent and for temporary teeth
 - Sealant
 - Varnish

eCharting indicators (4)

DentalCharting
Clinic Management

Work proposed (cont'd)

- Preventive full mouth oral hygiene therapies for permanent teeth
 - Oral prophylaxis
- Preventive full mouth oral hygiene therapies for temporary teeth
 - Oral prophylaxis
 - Fluoride treatment

eCharting indicators (5)

Behavioral

- Own tooth brush
- # / day brushing
- Tooth paste while brushing
- # / year brush change
- # / year dentist visit

eCharting filters

DentalCharting
Clinic Management

Graphs are extracted by setting filters:

- Geography
 - National
 - Region
 - Province
 - Chapter
 - City
 - School
 - Grade level
- Time (dormant)
 - Latest (year A, month B)
 - Earliest (year X, month Y)

Conclusion

Conclusion:

- Installment 2015-2016 of 6-year ASeCP completed on schedule
- Minimum limit cohort 6,200 elementary school pupils surpassed: 7,900 reached
- The 3-criteria objective met with flying colors
 1. Online eCharting at schools
 2. Automatically generating digital statistics
 3. Focus on ICDAS

Overall:

- Survey blatant success, surpassed expectations
- Groundwork laid for solid continuation next 5 years, as PDA's resolution stipulates

Recommendation

Expand eCharting database for existing 32 schools to include entire population at each school:

- Refresh eCharting training and ICDAS to the volunteer dentists
- Validate the April 2016 database jointly with them
- Expand encoding at the 32 schools
 - 2nd data set for the current 7,900 cohort
 - 1st data set for the remaining pupils not already in the 7,900 cohort
- For the 7,900 expand the statistics with Incidence Rate

Recommendation (2)

Bring on board:

- Dental scientist
- Statistician

Involve partners:

- DepEd
- DoH
- Other relevant partners

Recommendation (3)

Expand the database with hundreds of thousands of children on thousands of elementary schools:

- Evaluate the 7,900 cohort data sets
- Design a massive scale up program for country-wide cohort of hundreds of thousands
- Execute the program
 - Optimize the eCharting tool for scale up and statistics functionalities
 - Train eCharting dentists on massive scale
 - eChart the countrywide cohort
